Summary

Front-End Web Developer with a strong passion for creating engaging user experiences. Particularly enthusiastic about CSS styling and design, ensuring visually appealing and responsive interfaces. Recently graduated from Vanderbilt University's Full Stack Web Dev Bootcamp, dedicated to crafting seamless and visually appealing user interfaces.

Projects

Tasty Jams

Tasty Jams | <https://github.com/ErinHamrick/tasty-jams> | <https://erinhamrick.github.io/tasty-jams/>

“Tasty Jams” is a music rating app that allows users to rate songs on a scale of one to five. The app uses the Spotify API to pull songs from the Billboard Top 100 playlist, and the Wikipedia API to provide more information about the songs. The app is built using HTML, CSS, and JavaScript, and utilizes the Materialize CSS library for advanced styling.

Weather App

Weather App | <https://github.com/ErinHamrick/WeatherApp> | <https://erinhamrick.github.io/WeatherApp/>

Weather App allows users to search for any city and view the current conditions and a 5-day forecast. Each search is saved to a button at the bottom of the page for quick access, and the page can be cleared with a single click. The app uses multiple weather APIs to provide accurate and up-to-date information.

Mischief-Managed

Mischief-Managed | github.com/joseph-s-foster/Mischief-Managed | <https://mischief-managed-04c91ebdf0c9.herokuapp.com>

Mischief-Managed is a Harry Potter book progress tracker that allows users to log their completion percentage for each book. The application provides trivia facts at each 25% milestone.
